## SKINCARE

The ocean's natural cycle has put the Seaweed as the Jewel to the Crown since these extraordinary plants have managed to keep in their fibers, all the essential minerals and amino acids that the human being needs. To take advantage of their wonderful qualities is one of the best things we can do nowadays.

At ALGAMARE SKINCARE we are aware of these exceptional qualities and applying high-tech processes since the seaweed production, harvest and special treatments, we have achieved a range of products that are easily assimilated by our skin, thus obtaining the so precious minerals, vitamins and even trace element that our body requires.

One primary feature of our products is the high content of oligosaccharides and other substances that promote the formation of hyaluronic acid in our skin.

But why is this good for me? Well, the hyaluronic acid fills wrinkles naturally. Added to this, ALGAMARE SKINCARE products also favor the blockage of the hyaluronidase enzyme, achieving a longer lasting of the acid in the skin to bring greater benefits.

The production of hyaluronic acid decreases in our bodies over time, as in all things, and this is why it is up to us to supplement it.

But how? Luckily ALGAMARE SKINCARE is the answer, assisting the prevention of premature skin aging, the maintenance and embellishment of the face, body and hair.

## DAY CREAM, MOISTURIZER AND PROTECTIVE (FPS 35)

Protects against solar radiation: UVA and UVB rays. 35 Sun Protection Factor (SPF 35)

Increases skin hydration.

Fights the visible signs of aging and the appearance of new wrinkles. Softer skin, elastic and brighter.
