

ALGABALLO

EQUINE FORMULA

HEALTH ENHANCER

Brand Name: ALGABALLO® Equine Formula

Description: ALGABALLO® Equine Formula Algaballo® Equine Formula is a totally natural and organic feed ingredient comprising of a formulated blend of specific seaweeds. The complex blend used is sustainably harvested from the North Pacific Coast

The beauty of ALGABALLO® Equine Formula is in its simplicity. If your horses or ponies are able to absorb more nutrients from the feed you give them, they will thrive and perform better. Horse owners know about diet and nutrient uptake, and how important they are to overall horse health. As a result, horse owners often invest substantial amounts of money in quality feed for their horses and ponies. Yet the nutrient uptake from those feeds will be reduced if your horse or ponies gut health is poor.

When a small amount of ALGABALLO® Equine Formula is included in a horses or ponies diet it enhances their gut health, thus increasing their nutrient absorption. This allows your horses and ponies to absorb a greater level of nutrients and vitamins from the feed you are giving them.

This increase in overall health contributes to the appearance, behaviour, performance, recovery and ability to reproduce.
