

# ALGAMARON®

## PRODUCT DESCRIPTION

**Brand Name:** ALGAMARON®

**Description:** An Extruded pellet (EP) for shrimp farming. **ALGAMARON®** is a specialized feed for shrimp, which has unique characteristics due to its formula based on a balanced mix of seaweed flours that bring micro elements with an immunostimulant and physiological capacity that optimizes the digestive and the immune systems of the shrimp.

It also contains a natural seaweed binder (**NKB®**), which forms the pellets into their soft and foamy texture with excellent attractiveness and unique stability in water of at least 3 days.

- Main Benefits of ALGAMARON®:**
- ✓ Greater weight gain.
  - ✓ Improvement of FCR.
  - ✓ Efficiency against diseases such as White Spot and Early Mortality Syndrome.
  - ✓ Improves digestibility and optimizes shrimp metabolism.
  - ✓ Significantly improves flavor due to better levels of fatty acids.
  - ✓ Reduces pollution on farming ponds.

PRODUCT	PRESENTATION	PARTICLE SIZE	RECOMENDED USE
MICROPELLET 30/35	25	2.00mm * 6.00mm	FROM 3 TO 8 GRAMS
PELLET 30/35	25	2.40mm * 6.00mm	FROM 8 GRAMS TO THE HARVEST

**Guaranteed composition:**

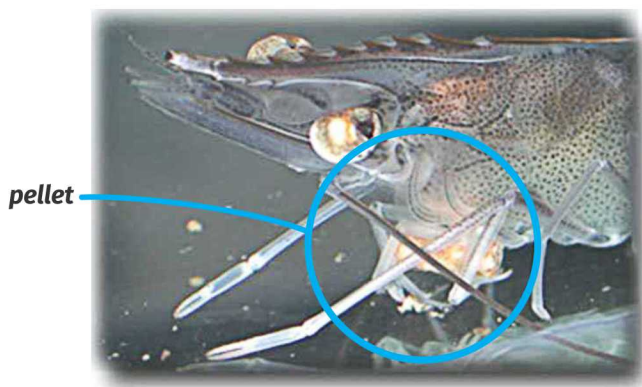

COMPOSITION	RANK %
Protein	25-35
Fat	5-8
Moisture	8-12
